

## **Earth's Changing Land GCTE-LUCC Open Science Conference**

March 14 – March 18, 1998

Barcelona, Spain

The Global Change and Terrestrial Ecosystems (GCTE) and Land-Use/Cover Change (LUCC) Core Projects

GCTE studies the effects of changes in climate, atmospheric composition, and land use on terrestrial ecosystems, and the consequent feedback to climate and atmosphere.

LUCC aims to document and understand global land-use and land-cover change, the forces that drive it, its relationship to climate and biogeochemistry, and the links between sustainability and land use.
