

**Survey of Needs, Gaps and Priorities on Data for Land Use and Land Cover Change  
Research Workshop organized by IGBP/IHDP LUCC and IGBP-DIS**

November 11-14, 1997  
Barcelona, Spain.

The LUCC Data Requirements Workshop provided a forum of relevant LUCC researchers aimed at identifying major situations where the progress in LUCC research is inhibited because of the lack or unsuitability of data, and assessing the nature and significance of these gaps.

The main objectives of the workshop were to:

1. Convene scientists to articulate their specific data needs for research.
2. Identify major common data needs.
3. Determine data priorities.
4. Identify monitoring system needs.
