

Two Postdoc Positions at UC Davis

Center for Spatial Technologies and Remote Sensing (CSTARS) Department of Land, Air, and Water Resources, University of California, Davis

One postdoc needed for NASA EOS-funded project to detect dry plant litter for ecosystem models.

Another postdoc needed for a SERDP invasive weeds grant (using 4m AVIRIS data) to map species/community compositions and predict spread of invasives. Candidate should possess good computer/gis/image processing skills but also a strong ecology/environmental science background.

Both projects require some innovation in the methods.

Announcement date 5/10/02; no application date provided.
